VIRAL – VIRTUAL REALITY ARCHIVE LEARNING NEWSLETTER
## ISSUE 2, NOVEMBER 2019

WHAT'S UP?

For the past couple of months, ViRAL has been preparing the conclusion of two products. Soon, the ViRAL Handbook, a manual containing case studies and best-case practices in the fields of post-industrial landscapes, archives, and their combination with digital tools, namely augmented and virtual reality (AR and VR) and 360° videos, will be available to a wider audience.

VIRTUAL REALITY ARCHIVE LEARNING (ViRAL)

Furthermore, we are preparing a platform with quests, essays and videos to be used in non-formal adult education activities. The tasks target both the trainer/facilitator/teacher and the person learning, so that there is the possibility for adults to develop the work in an autonomous manner. The contents are related to post-industrial sites, archives, and the use of the digital tools named before.

VIRAL WENT TO WUPPERTAL!

The third transnational partners meeting occurred in Wuppertal, Germany, from October 1st to October 2nd. During the course of the 2-day event, the team had the opportunity not only to discuss next-steps but also to visit Knipex, one the most iconic factories of Wuppertal, and to explore the city in the famous suspended rail.
